

## Occasional Broadcast Services

 ON AIR  
ON AIR

Over the years, the Occasional Use (OU) department has built a reputation for being a reliable provider of Telenor Satellite Broadcasting's (TSBc) own and third party satellite capacity for flexible solutions.

### Smart and cost-effective occasional solutions

From pre-planning capacity requirements for sports events, conferences or live concerts, to providing last minute bookings for news broadcasts, the team focus on what they do best - providing the right space segment at the right time and at the right price. We also offer more flexible bandwidth solutions, including 3&6 MHz to enable our customers to benefit from new broadcast technologies.

### Capacity when you need it

Telenor's primary source of occasional use capacity is located on our co-owned Intelsat 10-02 satellite, positioned at 1° West. We also offer lease capacity on Telstar 12 at 15° West and Astra 4A at 5° East and can provide dedicated capacity up to a year in advance on any of the three satellites. TSBc is able to supply competitive pricing on a wide range of third-party satellites, including, Telesat, Eutelsat, Intelsat and SES. This provides the flexibility to find the best capacity across the globe to fit your requirements.

### HD and SD turnaround services from our ground based network

In addition to providing pure satellite capacity, TSBc's ground based network permits the provision of uplink, downlink and turn-around services to a third of the world's satellites. The occasional uplink, downlink and terrestrial connectivity services are primarily offered from TSBc's two main teleports, Nittedal Earth Station, in Oslo, Norway and its Central London teleport, located in Russell Square. By utilising one of TSBc's teleport facilities, customers can uplink to 1° West as well as route signals to other non-Telenor satellites. Furthermore, TSBc is connected ASI/SDI to a number of key European PoPs.

### Excellent customer service

TSBc delivers top quality customer service and expertise for all your occasional broadcasting needs.

### Flexible solutions

As well as making use of our own resources, the OU team can provide a wide range of third party services, ensuring we deliver the most flexible solution for any occasional booking.

### Reliable support

TSBc's booking service provides full technical and operational support 24/7.
